Footnotes

- 1 CAS Chemical Abstract Service Registry Number. This number is provided where available to identify the ingredient.
- 2 FEMA Flavor and Extract Manufacturers Association reference number. This number is provided where available to identify the ingredient.
- 3 CoE The Council of Europe Reference Number. This number is provided where available to identify the ingredient.
- 4 Ingredient International Union for Pure and Applied Chemistry (IUPAC) name or common chemical name of the ingredient, listed in alphabetical order.
- 5 MUL Maximum Use Level. The maximum quantity at which the ingredient is used in any Philip Morris International brand in this country, expressed as a percentage of the tobacco blend weight (including moisture).
- 6 Function The function of the ingredient in the product. These functions are explained in more detail below:

Function	Description
Binder	Maintains the physical state and texture of the product.
Casing	Flavour ingredients and humectants which are added in quantities above 0.1% of the weight of the tobacco blend and are used to replace moisture lost during the curing process and as a carrier for flavourings.
Combustion Modifier	Influences how the product burns (not applicable for heatsticks).
Fibre	Starting substance and aid for homogenized and reconstituted tobacco.
Filler	Contributes to the bulk of the product without contributing significantly to its odour, taste, flavour or aroma.
Flavouring	Imparts a specific taste, flavour or aroma to a tobacco product. Individual flavouring ingredients, which can be natural, nature identical or artificial flavourings and flavouring compounds are used at less than 0.1% of the weight of the tobacco blend.
Humectant	Prevents the product from drying out.
Moisturizer	Used to adjust the water content (moisture) of the product.
Preservative	Protects the product from deterioration caused by micro-organisms.
Processing Aid	Facilitates the manufacturing process and are either not present in the end product or occur in residual amount and have no function in the final product.
Solvent	Dissolves or dilutes an ingredient without altering its function in order to facilitate handling and application.
