Philip Morris International

PMI is a global company selling products in around 180 markets and employing approximately 71,000 people worldwide.

Since 2016, we have set a new course for the company—staking our future on replacing cigarettes with scientifically substantiated, less harmful alternatives.

To date, we are the only company within the traditional international tobacco industry to have committed to phasing out cigarettes, encouraging adult smokers who would otherwise continue to smoke to switch completely to better alternatives. In addition to expanding our leading position in the smoke-free category, we now also seek to broaden our value proposition to develop products in wellness and healthcare with the aim of having a net positive impact on society.

Our transformation

Now we've made the decision to go smoke-free.

“We’re creating a PMI that will be remembered for replacing cigarettes with a portfolio of revolutionary products.”

We are doing this because we should ...

We understand the millions of men and women who smoke cigarettes. They are looking for less harmful, yet satisfying, alternatives to smoking. We will give them that choice.

We are building PMI's future on smoke-free products that—while not risk-free—are a far better choice than cigarette smoking.

Indeed, our vision—shared by all at PMI—is that these products will one day replace cigarettes.

Documentary: How Japan became a smoke-free success story

In the early 2010s, Japan's decline in cigarette sales was at a much slower pace than in comparable countries. But in 2015, something changed. Sales of cigarettes started declining five times faster than preceding years.

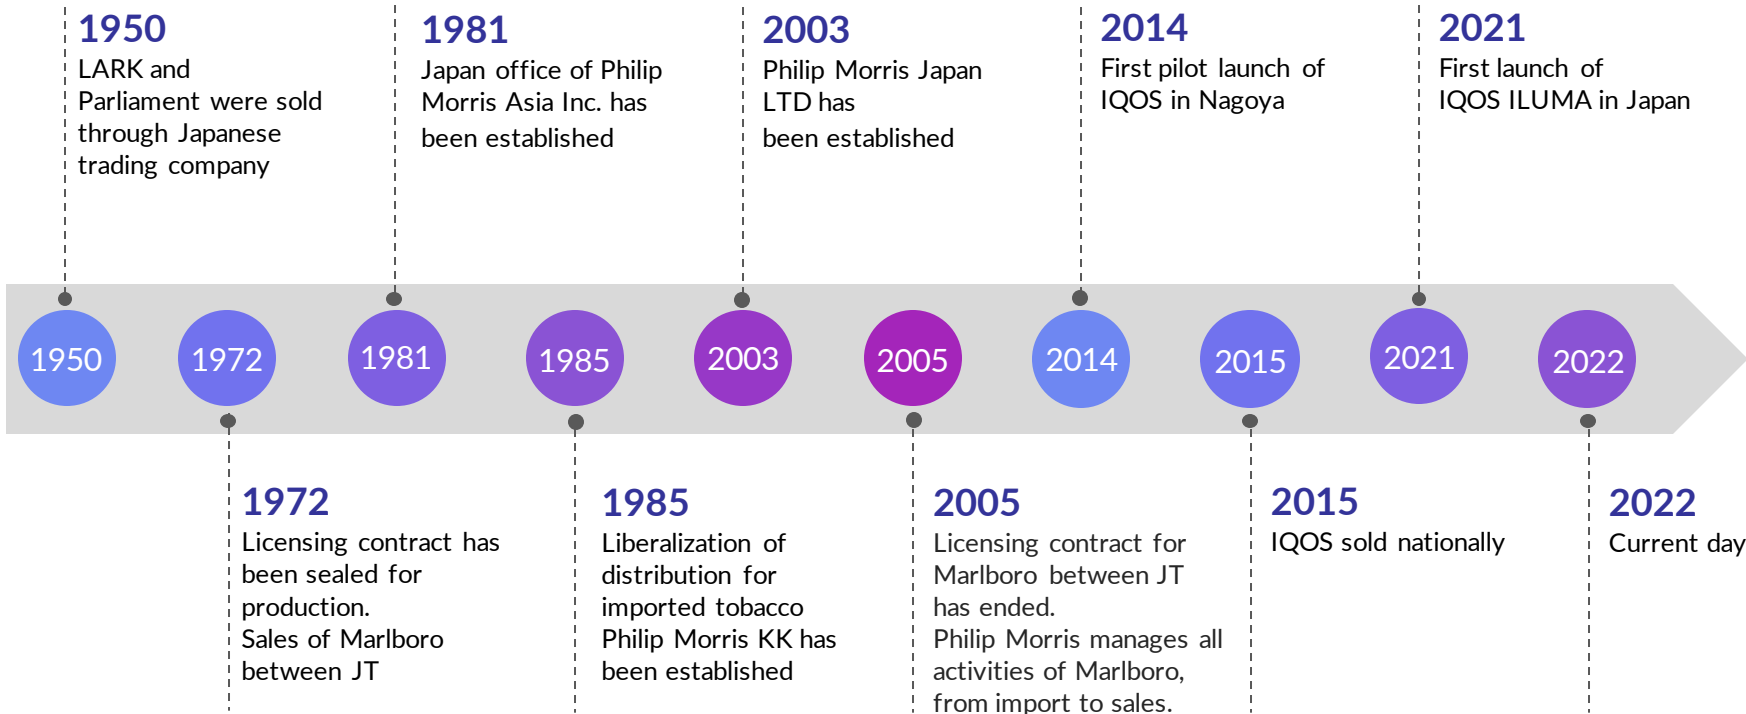

It was also the same year that we introduced the first smoke-free products in Japan.

Several independent studies suggest the significant decline can be attributed to the uptake of heated tobacco products.

Our heated tobacco products

What is a heated tobacco product?

Philip Morris International (PMI) has developed and produced several **heated tobacco products (HTPs)** under its IQOS brand. Also known as tobacco heating systems, and heat-not-burn products, PMI's HTPs were first launched in Japan in 2016, and are currently available in 68 markets worldwide. PMI estimates that 13.2 million* adult smokers have already switched to its IQOS HTPs and stopped smoking.

How does heating tobacco differ from burning tobacco?

Cigarettes burn tobacco at high temperatures, producing ash, tar, and smoke that contains high levels of harmful chemicals. But PMI's HTPs are heating tobacco to significantly lower temperatures without burning it, and therefore producing no fire, ash, or smoke. Because the tobacco is heated and not burned, the average levels of harmful chemicals are significantly reduced compared to combustible cigarettes.

Our Smoke-free landmarks

In response to the revised Health Promotion Law aimed at preventing unwanted passive smoking, which went into full effect on April 1, 2020, the establishment of spaces dedicated to heated tobacco products are spreading throughout Japan. Efforts to realize a "smoke-free society" are also underway at major tourist attractions throughout Japan.

The interview process

This is a typical interview journey candidates have when interviewing with us.

*This serves only as a guide, as **processes can differ** based on the skills requirement, seniority and complexity of the role.*

*While the number of steps and evaluation tools may vary, **we aim to be completely fair and consistent with every candidate.***

1. Application

Look through our job openings and submit an application online. Talent Acquisition (TA) team will review all incoming applications. You should expect to hear from us within 72 business hours.

2. Phone Screening with TA

You'll start the interview process by talking to a member of the Talent Acquisition team about the role and your experience. This is a general conversation about your background and skill set in relation to the role that you are applying for.

3. Interviews with Hiring Manager

You'll next speak with the hiring manager. During this conversation, they will ask more about your experience and skills, and you'll have an opportunity to ask detailed role-specific questions.

The number of interviews conducted at this stage varies from person to person (usually 3-4 rounds); the TA team will inform you in advance.

4. Assessment Test

The test will assess your skill set in relation to the role and the grade. You'll have 7 days to complete it.

5. Offer

If everything works out on both sides, you'll receive a job offer. Once both parties have agreed, a discussion of the offer will be arranged between you, the hiring manager, and the TA team.
